

# Full Ceramics Special

**IPS e.max®** Press ceramic with e.max® porcelain build up

**€110**

**Very aesthetic with wonderful natural looking translucency**

€110 - in 10 days from traditional impression

**ivoclar  
vivadent:**

**CEMENTS ADVICE**

IPS e.max Press- To achieve the best aesthetics from your IPS e.max all ceramic restorations we recommend aesthetic luting with **Variolink Esthetic**. Available in Light Curing or Dual Curing it is ideal for the permanent cementation of all ceramic restorations. The luting composite demonstrates exceptional shade stability for long lasting reliable aesthetic results.

**CEMENTS ADVICE**

IPS e.max CAD- As well as Variolink Esthetic, the manufacturer of IPS e.max CAD have developed **Multilink Automix** an easy to use dual curing luting composite with very high bonding values to Lithium Disilicate glass-ceramics. Used to successfully bond more than 10 million indirect restorations since its introduction in 2004, it's proven successful in the dental clinic.

## ZIRCONIA - Full countour Zirconia

FROM  
**€90**

**Strong material, great for posterior restorations**

€90 - in 10 days from Doc. Trios® scan  
€90 - in 10 days from traditional impression  
€110 - in 5 days from Doc. Trios® scan

**ivoclar  
vivadent:**

**CEMENTS ADVISE**

Zirconia- conventional cementation with Ivoclar Vivadent's **SpeedCEM** can be used for the placement of high strength crowns over retentive preparation. **SpeedCEM** is a self-adhesive, self-curing resin cement with light curing option, no etching, no primer, easy clean up, with good bonding values.

## Zirconia + Noritake porcelain build-up

FROM  
**€110**

**High aesthetic and strong**

€110 - in 10 days from traditional impression  
€130 - in 10 days from Doc. Trios® scan  
€135 - in 5 days from Doc. Trios® scan

**ivoclar  
vivadent:**

**CEMENTS ADVISE**

Zirconia and porcelain- **SpeedCEM** or **Multilink Automix**- straightforward and standardised cementation protocol for all different types of restorations. Patented combination of Monobond Plus alongside Multilink Automix establishes a sound and durable bond to oxide ceramics like Zirconia.

## The Prescription: e.max® or Zirconia?

### ZIRCONIA
